APFoods

Campus food, on your time.

FOOD INTELLIGENCE FRAMEWORK

Order between classes.
Pick up with a plan.

POWERED BY **FIF AI**

apfoods.vercel.app

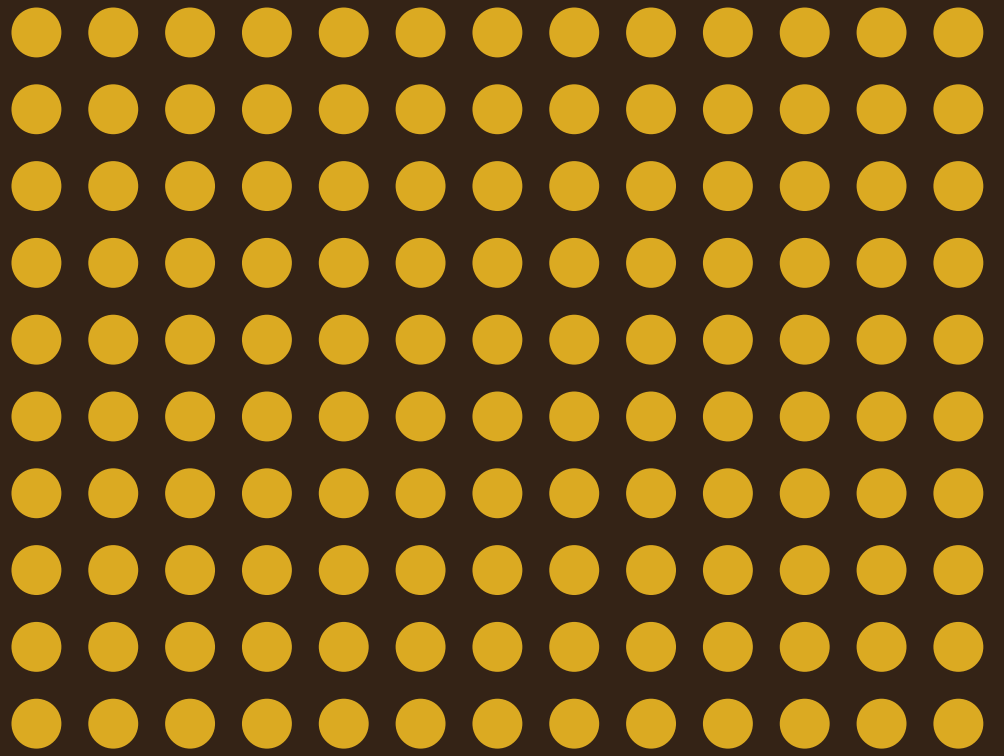

APFoods

A short break has little room for an unpredictable queue.

13,000+

students in APU's published campus community

130+ countries

Each dot represents 100 students

APU 2025 computing brochure. Campus population is context, not APFoods adoption.

STUDENT EXPERIENCE

APFoods

Food that fits the gap between classes

Browse. Order. Choose a pickup.

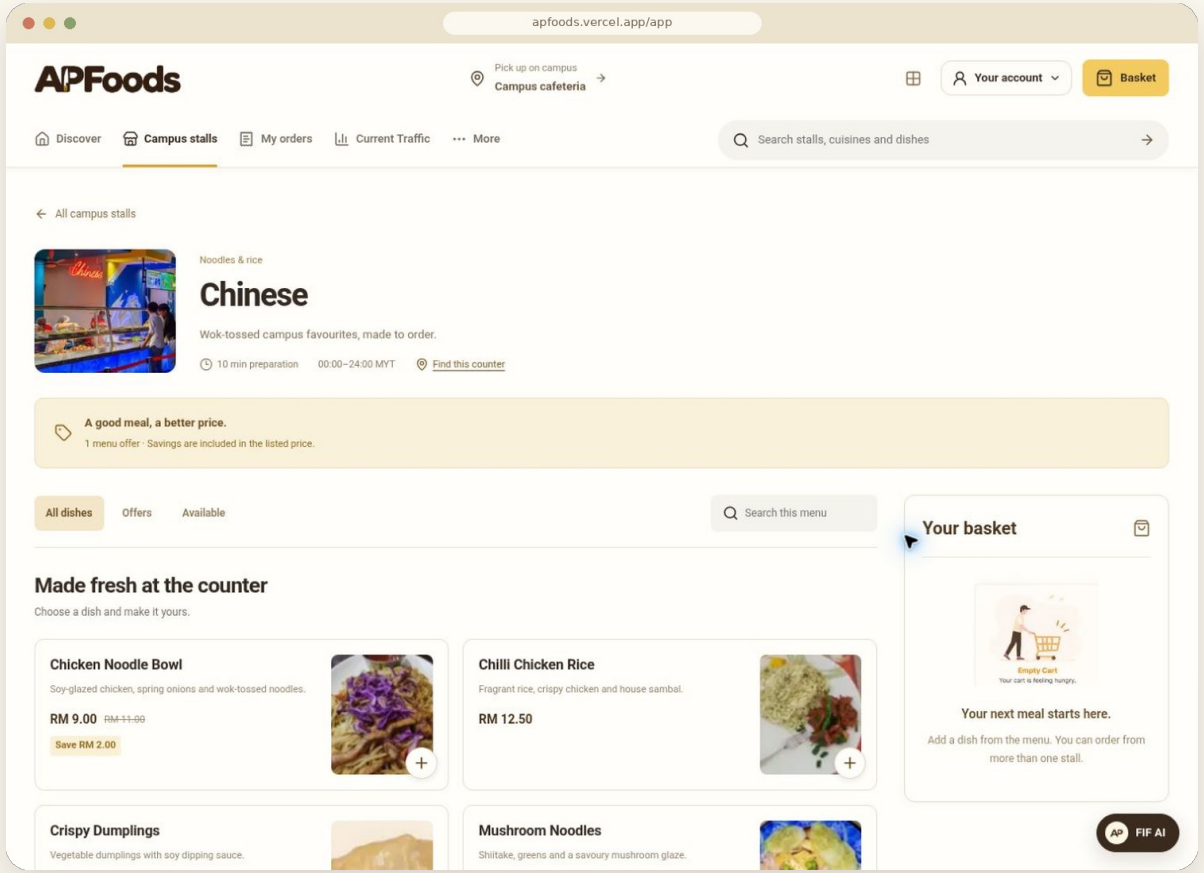

15-minute

capacity-aware pickup windows

01 One basket across stalls

02 Live order tracking

03 8-digit pickup verification

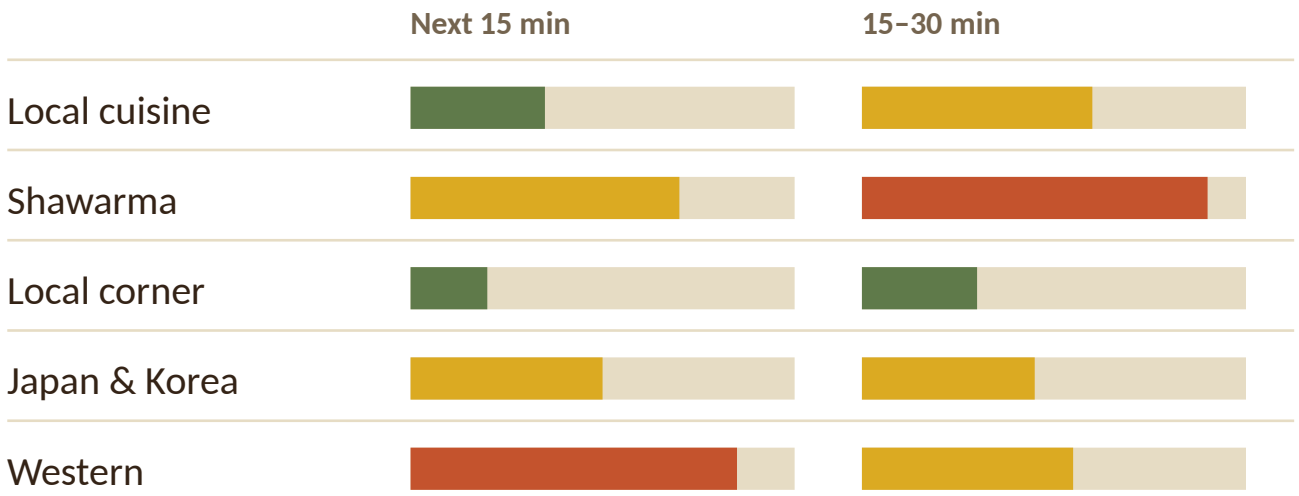

APFoods

A clearer picture before the walk

APP PICKUP LOAD · NEXT 30 MINUTES

Campus Cafeteria

Illustrative layout. Colours show booked capacity, not measured queues.

30 minute

look-ahead

See booked pickup demand by counter and food court.

App pickup load.
Physical queues are not measured.

APFoods

“Find me food under RM10”

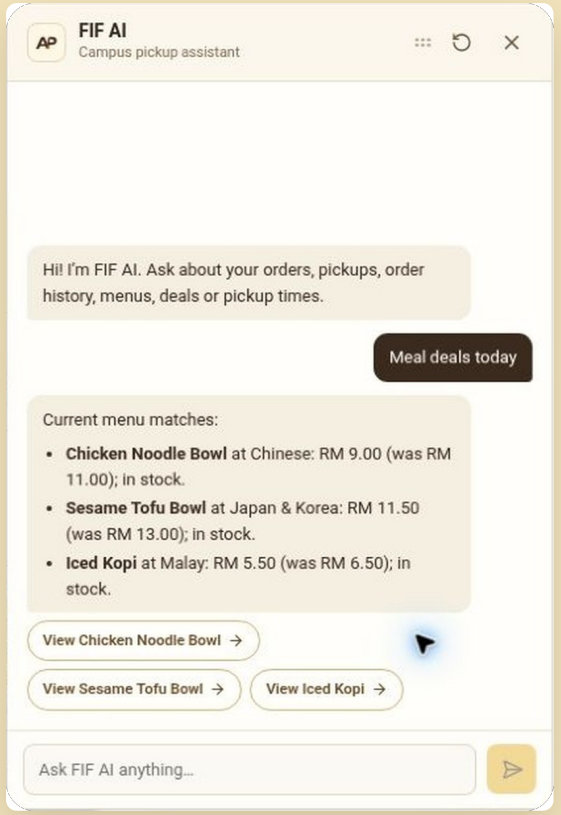

A request becomes a meal choice.

01 Search by budget or dish.

02 Compare current deals and pickup options.

03 Prepare basket additions for confirmation.

The student confirms the basket and completes checkout.

APFoods

How FIF turns live data into a useful next action

01

Read context

Menus, stock, prices, booked pickups and role-specific order data.

02

Apply rules

Filter by budget and availability. Build eligible operational actions.

03

Reason with AI

Gemini uses authorised tools and evidence to explain recommendations.

04

Validate output

Check IDs, evidence, numerical claims and allowed changes.

Routine lookups can use rules directly. Users confirm basket or vendor edits.

Administrator guidance stays read-only.

APFoods

Kitchen decisions backed by evidence

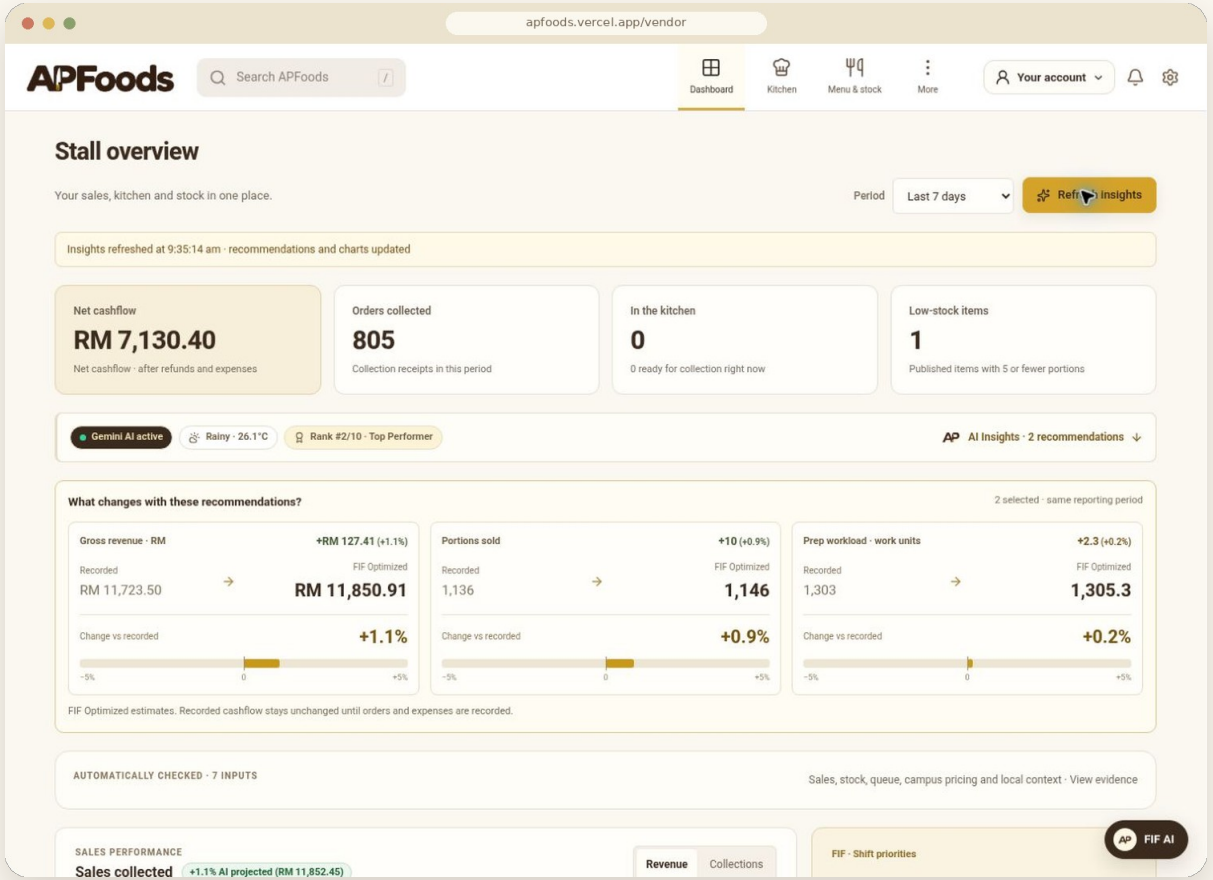

7 operational inputs

Sales and stock

Kitchen queue and campus prices

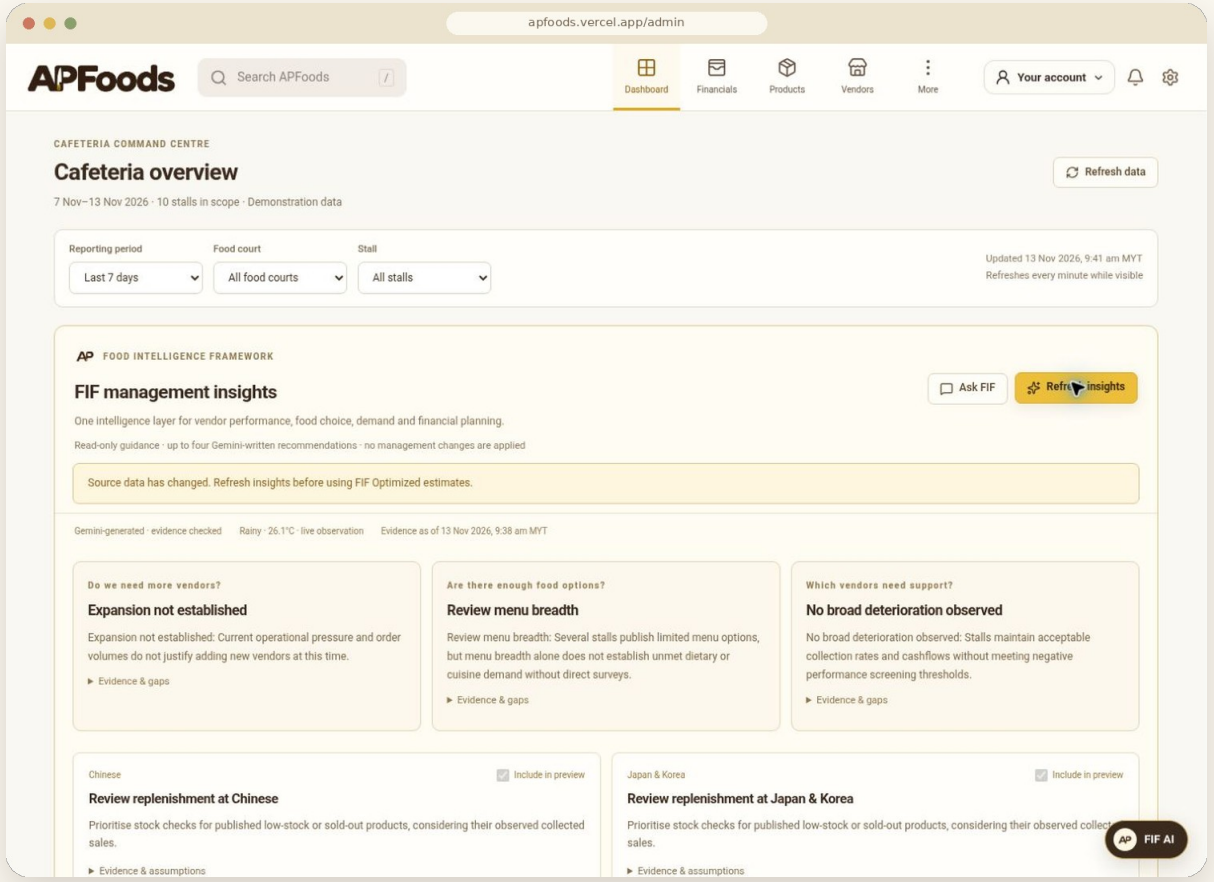

Timing, day patterns and local weather

Recommendations inform decisions.
Vendors confirm operational changes.

APFoods

One view of the whole cafeteria

10 **stalls**
in the deployed demonstration

Compare vendor performance.

Investigate stock and fulfilment risks.

Review cashflow and audit history.

Evidence-backed AI guidance.

Management retains authority.

ILLUSTRATIVE CAMPUS IMPACT

APFoods

If 20% of a 13,000-student community saves 10 minutes per day

433

student-hours per day

2,600 students × 10 minutes ÷ 60 = 433 hours

Campus community	13,000
Students using APFoods (20%)	2,600
Minutes saved each day	10
Student-hours per day	**433**

Scenario only. Adoption and time saved are assumptions to test in a pilot.

APFoods
